[redacted] a map overlay made of Sheet No. 1 of Map No. 1:15,000, showing the location of the Guns Willamshongt Qvar (Guns Electrical Factory), Unclassified. I have also drawn from memory, a sketch of the plant as of November 1976. (See Enclosure (A))			
2. The products of the Guns Electrical Factory are as follows:			
- large electrical generators, all of Hungarian design. - Turbines: 1000 rpm, with overload capability of an additional 1000 rpm, of Hungarian design. - large industrial transformers. - Electrical motors for Dnie type railway locomotives. - Phase regulators. - Frequency regulators.			
All of these products are sent to the Guns Wagon Qvar (Guns Locomotive and Railway Car Factory), which makes the Dnie type electric locomotives for the state railways. These electric locomotives will be needed by the state railway system as additional lines are being electrified. The standard-gauge railroad from Budaörs to Szekesfehervar is electrified. The station from
